Professional Summary

Software engineer with proven experience in developing scalable applications and implementing efficient, data-driven solutions. Skilled in collaborating with cross-functional teams to deliver high-quality software that meets business needs and drives measurable results.

Technical Skills

- **Frontend Development:** React.js, HTML, CSS, JavaScript (JS)
- **Database Management:** SQL (DBMS)
- **Data Analytics:** Data Analysis, Data Modeling, Design
- **Data Visualization:** Power BI Visualization

Education

- Dy Patil College Of Engineering:** BE in Artificial Intelligence and Data Science June 2020 – June 2024
- CGPA: 8.79/10
- Jai Hind Junior College** 2020
- Percent: 83.38

Experience

- Software Developer Intern,** IT-IMPACT UNIQUE GATEWAY, Pune Jan 2024 – June 2024
- Developed responsive web applications using React.js, HTML, and CSS, focusing on enhanced performance and user experience.
 - Resolved complex software issues efficiently, ensuring high customer satisfaction and streamlined client experiences.
 - Collaborated with cross-functional teams to implement machine learning models seamlessly, supporting timely and successful project delivery.
- Data Science Intern,** Personify, Pune Oct 2022 – Dec 2022
- Developed an intent-based chatbot that streamlines the query resolution process and provides a seamless user experience.
 - The deployment of a chat-bot reduced response time and increased customer retention.

Projects

- UserGit Analyzer** github.com/Neeraj-Shilwant/Usergit
- Designed and developed **UserGit Analyzer**, a web application that visualizes the public data of candidates on GitHub for insightful analysis and decision making.
 - Tools used: React, Github API
- Business Providing Service Website** [official-Website](#)
- Developed a **business service website** with responsive designs, ensuring seamless user experiences on all devices.
- Age Prediction using Deep Learning**
- Built an age prediction model using Deep Learning in PyTorch that estimates a person's age from uploaded images.

Custom Form to Google Spreadsheets

github.com/Neeraj-Shilwant/kasar-family

- Developed a custom React form that integrates with Google Sheets and MongoDB for seamless data collection and storage.

Stock Price Prediction Website using LSTM neural network

- Developed a stock price prediction website using an LSTM neural network to forecast future stock prices.
- Utilized moving averages as key features to improve prediction accuracy.

Certification

Google Data Analytics Coursera

Microsoft Azure AI Fundamentals

Data Science in Python Coincent

Ethical Hacking Warrior

Google Python Automation Coursera
